# Problem: What is Health Equity?

## Social Determinants of Health:

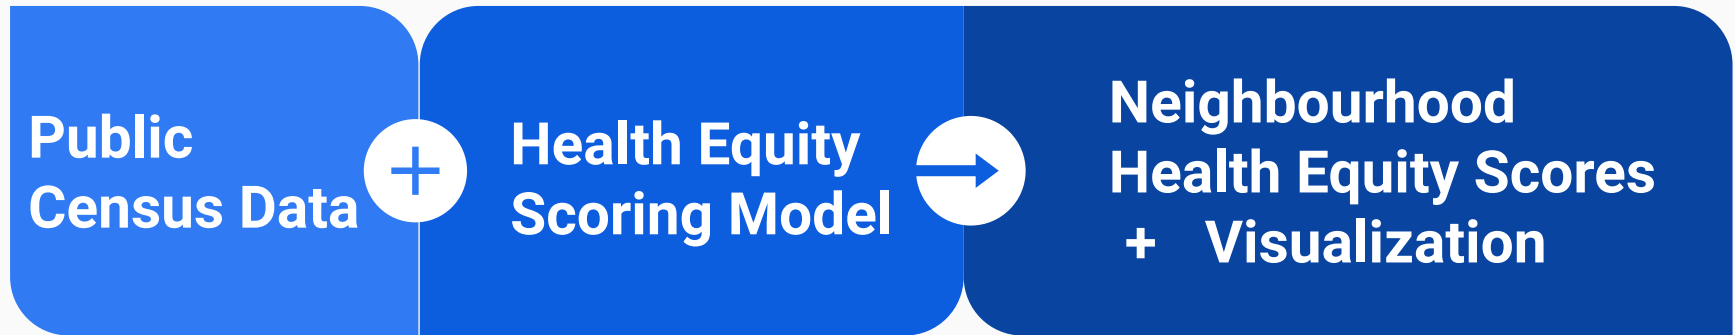

- 50% Lifestyle
  - Income
  - Education
  - Housing
- 25% Health care
- 15% Biology
- 10% Environment

# Problem: Neighbourhood Equity Index

Source: TSNS2020 City of Toronto

# Solution: Webtool to Explore Health Equity

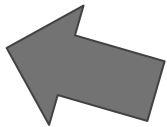

70 data points across 5 social determinants

Health Equity

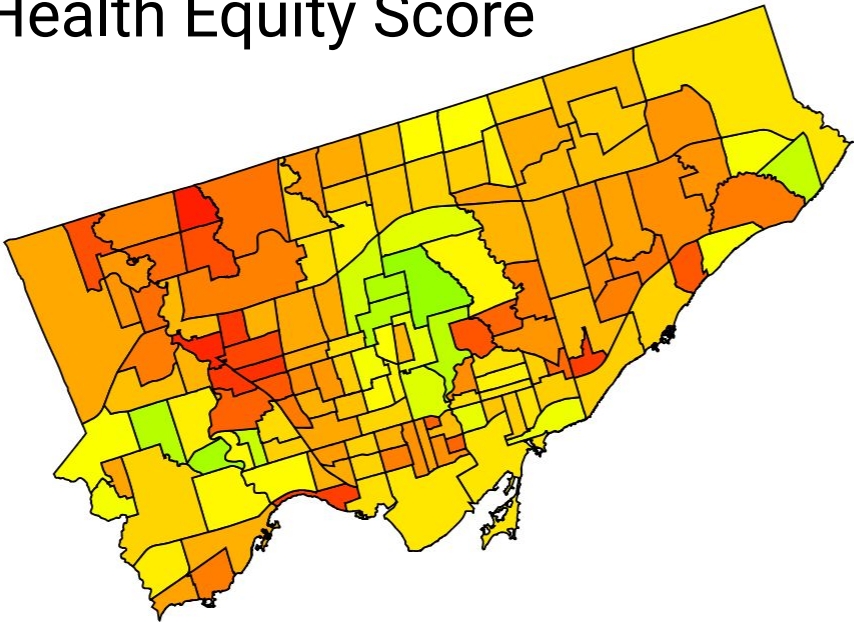

37%

Health Equity Score

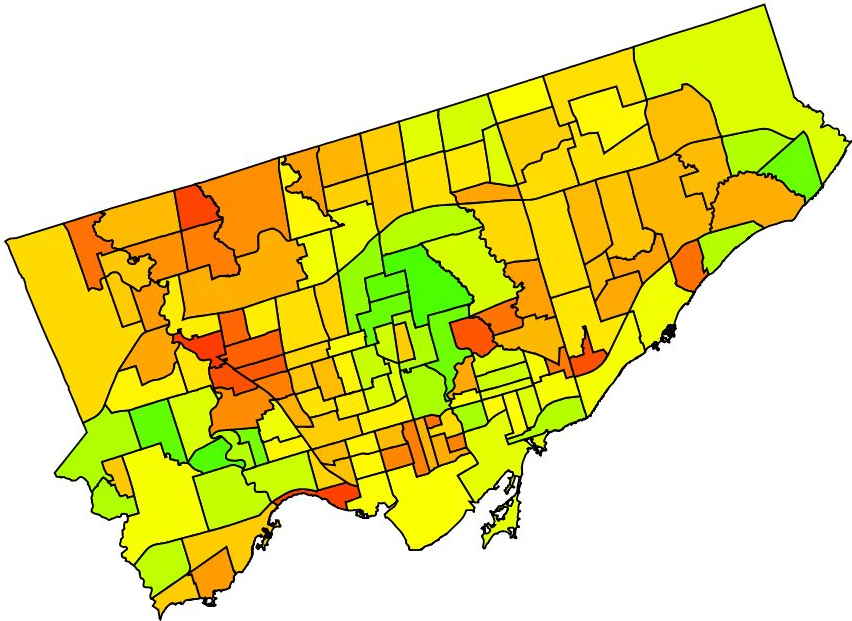

# Our City Today

45%

# City with Affordable Housing

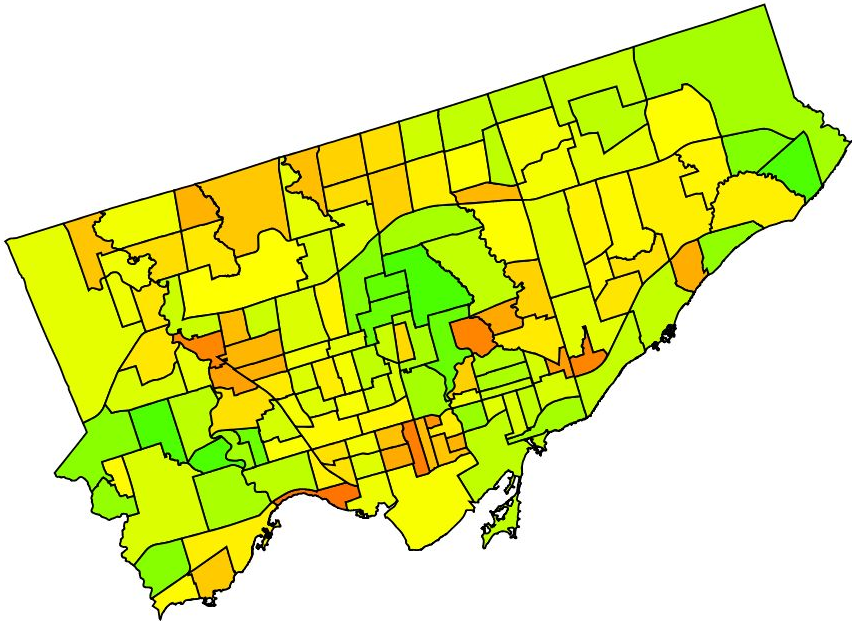

Health Equity

53%

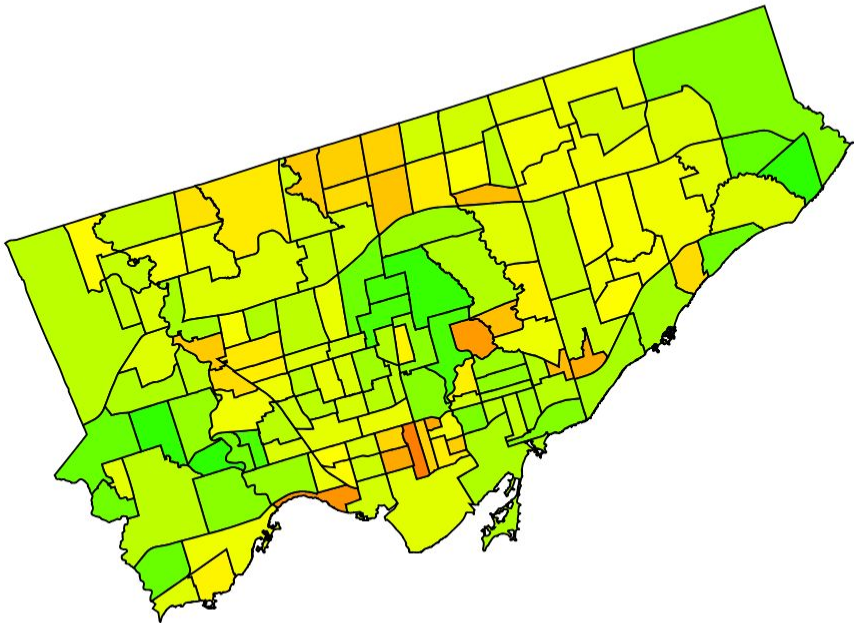

# City with Education Equity

58%

# A City with Racial Equity

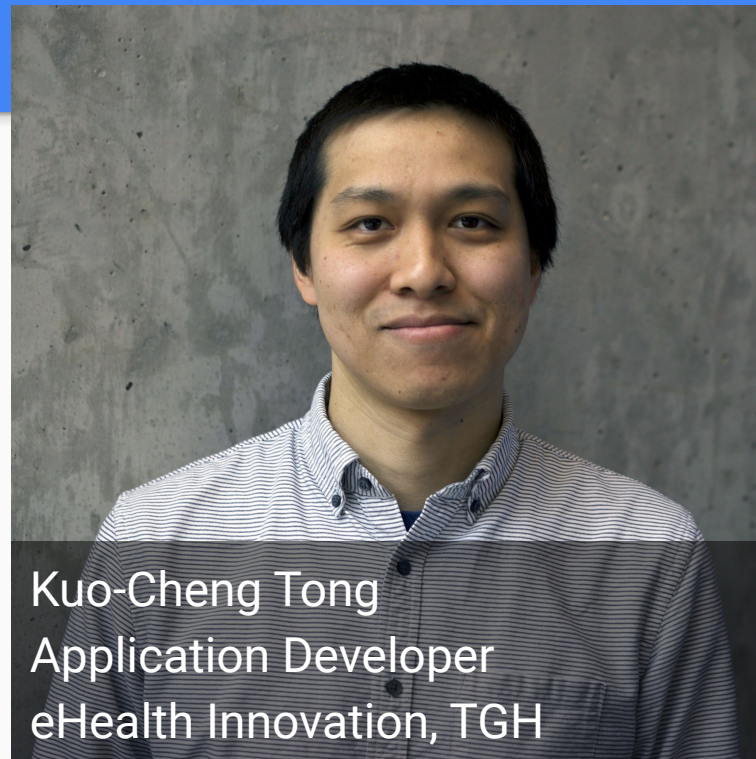

# Benefits

Community Members : Education and Awareness

Urban Planners : Predict impact of community programs and services on health equity

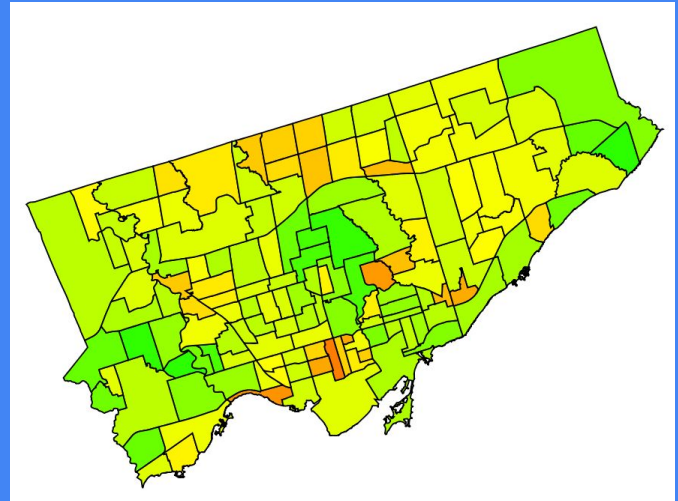

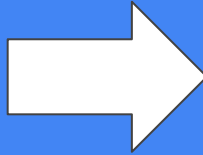

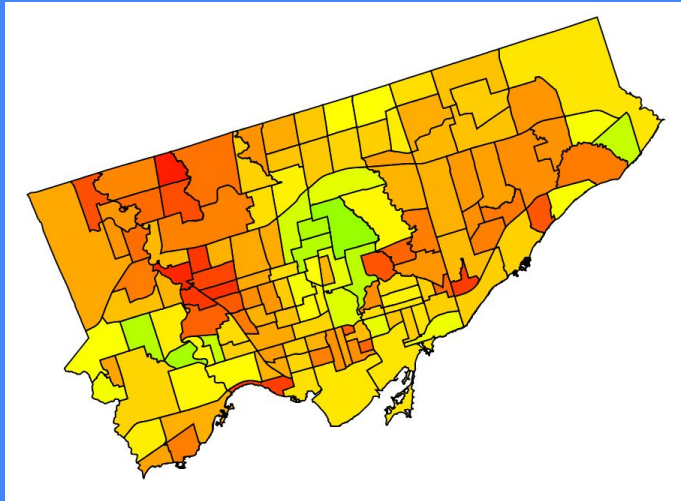

Policy Makers : Understand the large scale impacts of policies affecting social determinants of health.
